

# Pigment Yellow 150 - Nickel Complex Pigment

Pigment Yellow 150 is a transparent, dull green shade nickel complex pigment offering excellent light fastness, weather fastness, heat resistance, and migration resistance. It is used in coatings, plastics, and printing inks.

With its excellent resistance to boiling water, Pigment Yellow 150 is particularly suitable for engineering plastics such as nylon. It is widely used in automotive interiors and electronic component applications. The coating industry uses it for automotive finishes and industrial coatings, requiring outdoor durability. In the printing ink industry, it is utilized for high-quality printing.

Pigment Yellow 150 complies with the relevant requirements of the EU REACH regulations.
